

AccessData Summation Single-Server Requirements

Hardware Requirements (Configuration Based on Number of Users):

Configuration	Hardware	Operating System	Database Server
Workstation / Mobile / Laptop (single user)	<ul style="list-style-type: none"> • Intel Core i5 (4-cores) • 8GB RAM • 7,200 RPM 	Windows 7 Professional 64-bit (IIS 7.5 required)	SQL Server Express 2008 R2
Summation Express (Supports 3 Concurrent Users)	<ul style="list-style-type: none"> • Intel Xeon Quad-core (8-cores) • 16GB RAM • 10,000 RPM minimum 	Windows Server 2008 R2 Standard 64-bit	SQL Server Express 2008 R2
Reviewer	<ul style="list-style-type: none"> • Dual core • 2GB RAM 	Any that support Internet Explorer 8	n/a
File Server	<ul style="list-style-type: none"> • DAS / SAN / NAS • 10,000 RPM (Storage for collected ESI, Case data, and export/responsive data) 	-	n/a

Software Requirements:

Software packages to be provided by the customer include MS Windows, MS SQL Server, and MS Outlook. The edition of both Windows and SQL Server depend on the chosen configuration. For the workstation or mobile configuration using Windows 7 64-bit, IIS 7.5 is also required.

Additional Information:

It is recommended that for any and all configurations have a 1Gig NIC minimum. For detailed storage sizing specifications please refer to the System Specifications Guide. References to processing core counts indicate number of logical cores.
