AccessData eDiscovery and Summation 7.1.1 Release Notes

Document Date: 7/3/2019

Introduction

This document lists the new features, fixed issues, and known issues for this AccessData® Summation® release. All known issues published under previous release notes still apply until they are listed under "Fixed Issues."

- What is New in 7.1.1 (page 1)
- 7.1 Important Information (page 2)
- AccessData Legal Information (page 3)

What is New in 7.1.1

The following items are new and improved for this release:

System and Architecture

Database Compatibility with 7.1 AccessData Forensics Products
This version is compatible with version 7.1 of AccessData FTK/LAB/Enterprise.

7.1 Important Information

Updated Imager and AD1 Files

Any AD1 created by FTK/Summation/eDiscovery 6.0 or later can only be opened with Imager 3.4.0 or later.

Imager 3.4 can be freely download from the AD website: http://accessdata.com/product-download Using

an older version of Imager will result in an "Image detection failed" error.

This happens because the AD1 format was enhanced to support forward compatibility between AccessData applications. Newer AD1 files have a version 4 in the header instead of 3.

Known Issues for this Release

- When a PDF is password protected, the filtered text cannot be extracted. Random characters are displayed in the *Filtered Text* view rather than a warning that the text could not be extracted. (8679)
- If Port 80 is blocked on the server, the Web Console does not load and no error is displayed. (10087)

Comments?

We value all feedback from our customers. Please contact us at *support@accessdata.com*, or send documentation issues to *documentation@accessdata.com.*
